BMS 6071	New title: <u>Team-Based Community</u>
	New catalog description: The team-based community clerkship is part of the Medicine & Society Strand, the Longitudinal Family Medicine Clerkship and the Green Family NeighborhoodHELP. It provides a longitudinal opportunity for students to apply core knowledge and competencies from all the strands of the HWCOC curriculum. Each medical student is assigned to a medically underserved household in North Miami-Dade County with one nursing student and one social work student. Teams will also have the assistance of students from public health, law, education, and the health sciences (physical therapy, occupational therapy, communication disorders and nutrition). Family medicine faculty will supervise the student teams along with faculty from the other professions. Students work with assigned households to assess household strengths and needs and develop and implement a comprehensive plan to improve health. Students will present their assessments and plans to the students and faculty of their neighborhood. Students will establish relationships with household members and community partners in the neighborhoods and conduct a community asset mapping project to familiarize themselves with the history of the communities they will serve and identify the strengths and resources within the communities for addressing social and health needs. The online "fmCASES" provide students the opportunity for guided independent study of family medicine principles and the management of common clinical cases. Students will begin self directed work toward the Medicine & Society Capstone. Finally, students will be exposed to the clinical correlations to their community-level and household-level interactions.
