- SLOs on matrix and syllabus are not the same. Transfer the Global Awareness and Global Perspective outcomes on the matrix to the syllabus. Transfer the Global Engagement outcome on the syllabus to the matrix.

The committee voted to approve with minor revisions (Laha moved; unanimously approved)

The committee had the following reservations/suggestions:

- Although not required, the committee makes a friendly suggestion to include a co-curricular learning opportunity in this course, as the subject matter seems to lend itself to opportunities to extend and enrich learning outside of the classroom.
- In the course matrix, please clarify the assessment methods. The committee found the language for the minimum criteria for success confusing. The committee also reminds that it is not necessary to assess via faculty panel; if all students are subject to the assessment, the faculty member need only provide a summary of results. It is not required to take a sub-sample for review.

6. Review submission of Tourism Service Operations Management **(HFT 6345)**

The committee voted to approve with minor revisions (Shumow moved; unanimously approved)

The committee had the following reservations/suggestions:

- In the course matrix, provide more information concerning the nature of the assessments to enable committee to ascertain connection between activity and outcome; e.g. provide sample essay prompts and description of the student assignment.

7. Review submission of Hurricane Engineering and Global Sustainability **(CGN 4XXX)**

The committee voted to revise and resubmit (Shumow moved; unanimously approved)

The committee had the following reservations/suggestions:

- Reconsider the TBL 10-page paper assignment. In the committee's experience, this is not an effective assignment for the TBL methodology. The committee recommends having students produce a

Wiki or another artifact that requires that all students participate and makes it less possible for one student to carry the load.

- Consider addressing the media's role in hurricane readiness.
- The committee wonders whether or not climate change is addressed in the course to a greater extent than is indicated in the syllabus. If so, indicate where climate change is addressed.
- Consider using peer evaluations for group assignments.
- Correct typographical error on page 2: "This course aims to develop..."

8. Other business: None.
